Driven by a shared vision of extreme performance and sustainable innovation, they continuously deliver high-value-added integrated solutions for global outdoor, sports, urban, and industrial textile brands.

Covation Biomaterials LLC
United States
https://sorona.com/

CovationBio® is committed to making high-performance bio-based materials accessible to all. Their innovative solutions help improve product performance, support sustainability objectives, and create value across the supply chain.
CovationBio® Sorona® is a partially plant-based polymer that helps reduce their dependence on petrochemical resources. It offers high-performance textile products with a wide range of benefits, including comfortable stretch, long-lasting recovery, and exceptional softness and more.

Huamao (Vietnam) Company Limited
Vietnam
www.hmtex.com

Huamao is a fully integrated textile manufacturer with end-to-end capabilities spanning weaving, dyeing, and finishing.

At VIATT, they will highlight two of their innovations:

- **CORDURA® Fabric (N66 Nylon):** Engineered for maximum durability, high tensile strength, and extreme wear resistance.
- **3-Layer Laminated Performance Fabric:** A dynamic multi-functional solution designed to deliver ultimate waterproof, windproof, and breathable (moisture-permeable) protection.

PT Dan Liris
Indonesia
www.danliris.com

PT Dan Liris offers comprehensive textile solutions ranging from cotton, TENCEL™, viscose, and blended yarns, including polyester-viscose and polyester-cotton.

At VIATT, they will present:

- **WHOLEGARMENT® seamless knitwear:** developed with Shima Seiki technology, featuring one-piece construction, enhanced comfort, excellent fit, and versatile design possibilities for fashion and lifestyle apparel.

Shaoxing Kunye Textile Co Ltd
China
https://kunye.en.alibaba.com/

Founded in 2014 in Shaoxing -- China's largest textile hub -- Kunye specializes in high-end women's wear fabrics, including acetate, viscose, lyocell, imported polyester, wool, and mulberry silk.

This fabric is woven with acetate and polyester, combining the merits of both fibers. It features good moisture-absorbing performance and delivers luxurious, high-quality finished looks. Besides, it is easier to care for compared with mulberry silk.

Shikibo Ltd
Japan
https://www.shikibo.co.jp/english/

They have an integrated production system equipped with all the facilities necessary for spinning, weaving, knitting, processing, and sewing. They make the most of their originality as a leading global textile manufacturer.
